CLOSE SUCCESSFUL YEAR LARGE LIST OF GRADUATES.

Its First Commencement

Exercises.

Grantsville, May 12.—The first commencement of the Grantsville High school was appropriately celebrated here Friday.

For the first time Grantsville has introduced the higher work, and as a result three very promising young people were graduated from the ninth grade. Out of a class of ten who began last September, Austin Hunter, Connie Drouby and Lisle Cask remained to finish.

Special exercises were given in honor of them, at which Dr. J. T. Kingsbury, of the State university, and Superintendent Cummings of the church schools, each gave excellent encouragement and advice, both to the parents and the students. They made strong pleas for the establishment and proper maintenance of high schools, and incidentally showed the absolute necessity of college training in these days of stern competition and endless advancement.

made strong pleas for the establishment and proper maintenance of high schools, and incidentally showed the absolute necessity of college training in these days of stern competition and endless advancement.

This event came as a happy culmination to the fine record made thus far in the matter of educational work. Grantsville has been greatly favored this season by the high grade of culture and entertainment which has been brought in by the school teachers. Principal Kelly and his fellow teachers have worked hard to give the people of this town and the children at school an educational environment by bringing to them the best and biggest men in many walks of life. These men have come from many sections of the state and although the effort and expense attached have been quite a severe tax on the limited resources, yet it has been accomplished, and has proven a valuable investment. Although there have been very aggressive in their attitude toward education, and now school closes after a most successful year.

with a severe wind storm. The whole valley, from Stockton north and east, appeared as if it were a desert, with scarcely an evidence of life, for everything was buried in dust.

Tooele county is carried away by the spirit of sport. Almost every day in some part of the county are great games of ball played. So far, Grantsville is almost egotistical over the success of her boys, who so far, have taken everything before them. On Friday next Grantsville and Tooele will play for a purse of \$20.

BREAD DYSPEPSIA. The Digestive Element Left Out.

Bread dyspepsia is common. It affects the bowels because white bread gested in the intestines, not in the stomach proper. Up under the shell of the wheat berry Nature has provided a curious deposit which is turned into diastase when it is subjected to the morning the motion for a new trial of the human intestines.

This diastase is absolutely necessary to digest starch and turn it into grape sugar, which is the next form; but that part of the wheat berry makes dark flour, and the modern miller cannot readily sell dark flour, so Nature's valuable digester is thrown out and the human system must handle the starch as best it can, without the help that

troubles exist, when we go so contrary to Nature's law. The food experts that perfected Grape-Nuts food, knowing these facts, made use, in their experiments, of the entire wheat and barley, including all the parts, and subjected them to moisture and long continued warmth, which allows time and the proper conditions for developing the diastase, outside of the human body.

In this way the starchy part is transformed into grape sugar in a perfectly
